### EXAMINER'S AMENDMENT

1. This action is responsive to amendment received on Feb. 28, 2006. Claims 1-36 are pending examination.

#### *Terminal Disclaimer*

2. The terminal disclaimer filed on March 13, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,542,740 has been reviewed and is accepted. The terminal disclaimer has been recorded.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Dalla Valle on March 9, 2006.

4. The application has been amended as follows:

**Claim 1. (CURRENTLY AMENDED)** A method for facilitating user interface roaming, comprising:

receiving by an infrastructure server from a wireless device a list of usable interface clients in proximity to the wireless device, wherein each usable interface client has capabilities associated therewith;

selecting by the infrastructure server one of the interface clients from the list;

notifying by the infrastructure server the wireless device of the selected interface client;

Art Unit: 2157

initiating by one of the infrastructure server and the wireless device a connection with the selected interface client;

executing by one of the infrastructure server and the wireless device an application based on the capabilities of the selected interface client, wherein execution of the application generates content; and

transmitting the generated content to the interface client.

**Claim 13. (CURRENTLY AMENDED)** A computer program product facilitating user interface roaming, comprising:

at least one computer useable medium including computer readable program code such that when executed by one or more processors, the computer readable program code causes the one or more processors to:

receive by-via an infrastructure server from a wireless device a list of usable interface clients in proximity to the wireless device, wherein each usable interface client has capabilities associated therewith;

select via the infrastructure server one of the interface clients from the list;

notify via the infrastructure server the wireless device of the selected interface client;

initiate via one of the infrastructure server and the wireless device a connection with the selected interface client;

execute via one of the infrastructure server and the wireless device an application based on the capabilities of the selected interface client, wherein execution of the application generates content; and

transmit the generated content to the interface client for display.

**Claim 25. (CURRENTLY AMENDED)** A system for facilitating user interface roaming, comprising:

logic for receiving by an infrastructure server from a wireless device a list of usable interface clients in proximity to the wireless device, wherein each usable interface client has capabilities associated therewith;

logic for selecting by the infrastructure server one of the interface clients from the list;

logic for notifying by the infrastructure server the wireless device of the selected interface client;

logic for initiating by one of the infrastructure server and the wireless device a connection with the selected interface client;

logic for executing by one of the infrastructure server and the wireless device an application based on the capabilities of the selected interface client, wherein execution of the application generates content; and

logic for transmitting the generated content to the interface client.

5. Claims 1-36 are allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hussein A. El-chanti whose telephone number is (571)272-3999. The examiner can normally be reached on Mon-Fri 8:30-5:00.
